

Apptivity Planning Sheet

Target Group (E.G. YEAR 5 WHOLE CLASS, SMALL GROUP OF YEAR 3 STUDENTS REQUIRING SUPPORT)

Whole class of year 2 students, with levelled cards for lower, middle and higher ability levels.

Outcomes (WHAT IS IT YOU WOULD LIKE YOUR STUDENTS TO ACHIEVE?)

Represent fact families in a variety of ways.

Which apps will help students demonstrate these outcomes?

(WILL THERE BE CHOICE IN THE APPS STUDENTS USE?)

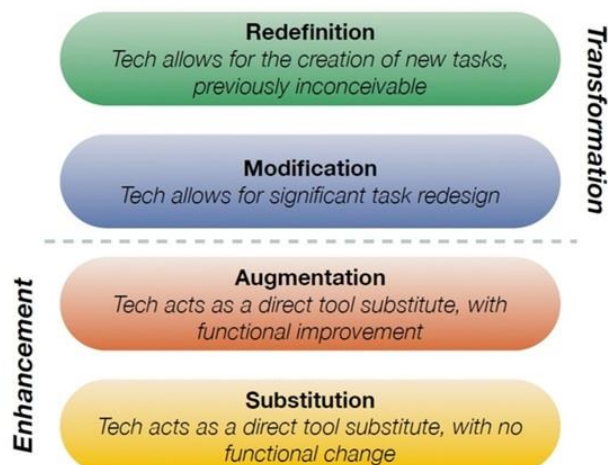

Explain Everything, Number Line, Number Frames and QRafter.

Students will insert a photo of a fact family card in Explain Everything and add representations of the fact family from Number Line and Number Frames. They will complete the fact family and scan a QR code to check their answer.

Where does the task sit in the SAMR Model?

- REDEFINITION
- MODIFICATION
- AUGMENTATION
- SUBSTITUTION

Could I modify the task so it sits higher in the SAMR Model and becomes a richer task? How?

Share student samples to other classes and parents via Twitter. Pose questions about samples to other classes. E.g. Can you answer the missing fact from the fact family using the number line and number frame?
